- Cosmetics ARKADIA is based on lamellar emulsions structurally compatible with the skin
- Cosmetics ARKADIA normalizes the condition of different skin types, strengthens the epidermal barrier, enhances natural protection, has a restorative effect
- Cosmetics ARKADIA has established itself as a reliable care for sensitive skin

The production facilities and processes of ARKADIA Cosmetics Laboratory meet the requirements of the Technical Regulations TRTS 009/2011 of the Customs Union (EAEU), has a certificate ISO 9001-2015.

We are proud that we work close together with cosmetologists. Our team is always available for feedback. Together, we play our part in the cosmetics creation process.

We offer: training and certification, flexible pricing, free samples, and printed presentation supports.

At present there are more than 100 professional cosmetic products.

Line for domestic use: more than 60 cosmetic products for all ages and skin types.

ARKADIA inner research and development fundamentals

1. ARKADIA develops its own original formulations. Keeping apart from the standard solutions brings recognizability to the ARKADIA cosmetic products.
2. The main feature of ARKADIA cosmetics is to maintain the barrier function of skin, improve skin condition, relieving pathological sensitivity.
3. ARKADIA Cosmetics Laboratory creates its creams based on lamellar emulsions and refuses of using standard emulsifiers and rigid surfactants.
4. The wide range of the active ingredients, used in ARKADIA cosmetic preparations, includes high-tech extracts with guaranteed content of active ingredients, regulatory peptides, valuable oils, vitamins, fermented active components and those of biotechnological origin.
